SMARTCODE CALIBRATION

SECTOR PLAN

A key issue to citizens of Lawrence is how and where growth will occur. The Sector Plan for the city addresses the most beneficial locations for growth, and also puts in place a mechanism for protecting the rolling hills, key drainages, wetlands and prairie.

In the SmartCode there are six specific Sectors that establish where development is allowed. Two Sectors (O-1, O-2) are for open lands (Preserve and Reserve) and the other four (G-1, G-2, G-3, G-4) are for urban growth of varying intensity (Restricted, Controlled, and Intended Growth Sectors for new communities, and the Infill Growth Sector for existing urbanized areas.)

-  O1 Preserved Open Areas that consists of areas protected from development in perpetuity. This Sector includes areas under environmental protection by law or regulation, as well as land acquired for conservation through purchase or by easement.
-  O2 Reserved Open Areas that consist of open space that should be, but is not yet, protected from development.
-  G1 Restricted Growth Areas that have value as open space but are subject to development
-  G2 Controlled Growth Areas where development is encouraged, as it can support mixed-use by virtue of proximity to a thoroughfare.
-  G3 Intended Growth Areas along high-capacity thoroughfares that can support a substantial commercial program.
-  G4 Infill Growth Areas consisting of traditional urbanism and/or conventional suburban developments. Both subject to revitalization or infill according to Article 4.

No G3 is permitted by right since a secondary Regional Commercial District is not planned to compete with Downtown Lawrence. The target size within G2 indicates a cluster development or traditional neighborhood development.
